

Chen Air Samia and Area - VOC Results

Station: 12-May-23
Date Updated: 12-May-23

Measured top to July 4, 2022 (Pardon Me!)

Station: GC/MS

Note: All non-detectable results are reported as "<" (detection limit)

Table with columns: Substance Name, No. of valid samples, Maximum, Minimum, 24 Hour AAQC, No. > 24 Hour AAQC, and 24-hour concentrations for various VOCs from 5-Jan-22 to 31-Dec-22.

ND means below method detection limit, only values measured above detection limit are shown. Not Sampled. The station was relocated from Starboard to Portside during this period and a result in samples was taken. GC/MS concentrations are reported as N/A. Not Analyzed. This site is participating in a workshare and this component was not analyzed.
